DARSHAN PANCHAL

SUMMARY

Creative and forward-thinking Web Developer creates cutting-edge websites and applications for high-profile clients with challenging demands and visions. Problem-solver with top-notch organizational, scheduling and code verification skills.

EXPERIENCE

Frontend Intern
January 2023 - June 2023

- Developed web applications using HTML, CSS, JavaScript,
- Designed database schemas to store user data securely.
- Monitored website performance and optimized code for speed optimization.
- Implemented responsive design techniques to ensure optimal viewing experience across multiple devices.

PROJECTS

ROAD ASSIST :
Developed an innovative Road Assist Web application.
Utilized NEXT.JS, Node.js, MongoDB, Axios, Body Parser, and Next UI for development.
Security features : Implemented secure authentication and data encryption for enhanced user privacy and security. Utilized Crypto.js for encryption and JWT (JSON Web Token) for maintaining sessions.
Communication and Notifications: Orchestrated seamless communication between users and service providers.
Automated notifications using email.js for efficient communication.
User Interface: Leveraged advanced UI components provided by Next UI.
Created intuitive and visually appealing user interfaces for enhanced user experience.
Database Optimization: Designed and optimized scalable database schemas in MongoDB.
Ensured efficient data management for seamless operation of the application.
SPOTIFY CLONE :
Created a client-side Spotify clone using HTML, CSS, and JavaScript.
User Authentication: Implemented secure user authentication to allow users to sign up, log in, and access their personalized accounts.
Music Playback: Enabled seamless music playback functionality, allowing users to play, pause, skip tracks, adjust volume, and view track progress.
Responsive Design: Utilized media queries and responsive design principles to ensure a consistent and optimized user experience across various devices, including desktops, tablets, and mobile phones.
JSON Data Population: Populated music cards dynamically by utilizing a JSON file, providing a flexible and scalable approach to manage music data.
